

What's New

A What's New page allows you to post the title, date, and a brief description for upcoming news and changes that occur in your district or school.

For example:

The What's New component can be used in several ways, including posting upcoming extra-curricular events. To illustrate, a member of the prom committee could use the What's New page to register prom attendees prior to the prom date. The prom committee can set up the page so on a certain date a message will appear stating that prom registration has begun. The committee can also create an end date when the registration ends.
